

1st SaaS Web Push Notification platform with an advertising network to **activate** your audience.

3rd quarter 2023

The Web Push Notification Barometer

What is a Web Push Notification?

Web Push allows you to identify a **point of contact** with visitors to a website and retarget them in real time, directly via their **computer or mobile device**, even if they're not necessarily in the act of browsing the web. Web Push Notification is a clickable message featuring an image, a title, a personalized message, a logo and a CTA.
